A program of research on advancing equity in pediatric pain research and clinical practice

Katelynn Boerner, PhD RPsych (she/her/elle)
Supervisor: Dr. Tim Oberlander
Department of Pediatrics, Faculty of Medicine, University of British Columbia
BC Children’s Hospital & Research Institute

Speaking with gratitude from the traditional, ancestral, and unceded territory of the Musqueam, Squamish, and Tsleil-Waututh Nations.
Pt is a 16-year-old trans male with chronic MSK pain, EDS, high-functioning ASD, anxiety, and NSSI. Family recently immigrated to Canada and have few financial or community supports.
### Participants

60 adolescents (75% female; 86% White, age 13–18 years) were recruited from the Chronic Pain Service. Most parents reported being university-educated, employed, and married. Exclusion criteria were developmental delay, psychiatric disorders, concurrent chronic illness that might impact pain ratings, non-English speaking.
