

**Bruce Carleton, BSc, PharmD, FCP, FISPE**  
**Professor & Co-Division Head, Translational Therapeutics**

Bruce has been at BC Children's and UBC since 1991. He established a research laboratory and has a clinical referral practice. Each day for him begins with gratitude for what he has experienced, even for what was hard and what allowed him to learn and grow. He has loved helping others find their way in life because it helps him find his own way. He is an active listener and an all-encompassing concern for the welfare of those with whom he works.

**Mercedes Chan, MD, FRCPC**  
**Clinical Associate Professor, Division of Rheumatology**

Mercedes is an early-mid career academic physician who has navigated two academic positions and various academic leadership roles both locally and nationally. She is in her second decade of medical practice and brings 7 years of experience as a program director in which she has worked with many trainees to navigate the transition to practice. She is passionate about setting trainees and junior faculty up for success and has been sought after by other program directors to teach junior faculty/senior trainees career planning and around the job application process. Her passion is medical education, global health and coaching, the latter which she believes truly can help one fulfill one's full potential and significantly contribute to wellness. She is a deep, perceptive listener who can be playful and encouraging with gentle challenge. She is warm, approachable, and empathetic.

**Zaneta Lim, MD, FRCPC**  
**Clinical Instructor, Department of Pediatrics**  
**Co-Director of the Year 3 Integrated Community Clerkship (ICC), Northern Medical Program**

Zaneta is a general pediatrician with experience working in Rural and Remote British Columbia with experience working in a resource - poor community practice.

She has experience in Community Pediatric Practice in multiple communities around BC and in locating around BC.

**Deepak Manhas, MD, FRCPC**  
**Clinical Associate Professor, Division of Neonatology**  
**Medical Leader, Simulation Services, C&W**

Deepak has a Master of Medical Education and been a program director for 10 years. He has experience as a remediation supervisor for several pediatrics and pediatric subspecialty trainees. He is passionate about early career mentorship and has headed this program for pediatrics for several years, and just stepped down this past January.

**Anton Miller, FRCPC, MB**  
**Clinical Associate Professor, Division of Developmental Pediatrics**

Anton is a seasoned clinician and researcher in children, youth and families living with chronic health conditions and disabilities. He is a critical thinker and a good listener.

**Tim Oberlander, MD, CM, LMCC, FRCPC**  
**Professor, Division of Developmental Pediatrics**

Tim has 30+ years as a clinician-scientist giving him an ideal perspective as a mentor.

He straddles the thrilling and at times uncertain clinical (Developmental Pediatrics and Pain Medicine) and research (developmental origins of stress regulation) worlds. His approach to mentoring is grounded in the notion that learning is a question-driven process. It's not the facts you learn or answers you find, but rather finding the great questions you ask.

His experience as a mentor across all levels of training provides him with unique qualities that enables him to be a resource, supporter and catalyst for successful learning while shaping an active and bidirectional relationship between mentor and mentee.

**Dina Panagiotopoulos, MD, FRCPC**

**Clinical Professor, Division of Endocrinology & Diabetes**

Dina is an experienced mentor and coach and has expertise in being a scholar, including research, QI, and knowledge of the promotion process that would be helpful to potential mentees.

**Wingfield Rehmus, MD, MPH, FAAD**

**Clinical Associate Professor & Head, Division of Dermatology**

Having raised three children while balancing demands of an academic medicine career, living overseas for 2 years, and shifting from part time work back to full-time work as division head, Wingfield has experienced a variety of challenges at different stages of her career and family life. She is passionate about connecting her work to her deeper purpose and to those things that bring her both personal fulfillment and joy. As such, it would be her pleasure to serve as a mentor for a faculty member who is on a similar journey.

**Brett Schrewe, MD, FRCPC**

**Assistant Professor, Island Medical Program, UBC**

Brett has expertise/wisdom helpful for people who are looking to navigate multiple hats; are community-based, are history/social sciences/humanities-curious, like qualitative research, are interested in scholarly approaches to health professions/medical education, have kids, etc.

**Caron Strahlendorf, MBBCh, FCP, FRCPC, D. Health**

**Clinical Professor & Head, Division of Hematology/Oncology/BMT**

Caron is committed to facilitate the professional, academic, and personal growth of all faculty - to help find joy and purpose in our work and careers. She has more than 30 years' experience in academic medicine, is a working mother and finds joy in bringing out the best in all.

**Lori Tucker, MD, FRCPC**

**Clinical Professor & Head, Division of Rheumatology**

Lori has worked at BCCH for a long time, as a clinical faculty member in the Division of Rheumatology who slowly developed a successful research program. Her passions are taking excellent care of children and families, supporting all members of a multi-disciplinary team at BCCH to work together as a successful group, advancing research in pediatric rheumatic diseases (locally, nationally, and internationally), and engagement with parents and patients in developing a Canadian community in childhood rheumatic disease. Her long-term experience at BCCH and BCCHR means she knows a lot of people and groups, as well as other groups and communities in Vancouver and the province. She recognizes that for many younger faculty, getting those connections can be difficult.

She is a mum of two lovely young adults and have worked throughout their lives, so quite a lot of lived experience as a working academic physician mum.

COMING SOON

**Judy Wolfe, MD**

**Clinical Assistant Professor, Division of Hematology, Oncology & Bone Marrow Transplant**

As a General Pediatrician with 25 years of experience in multiple settings and roles around BC, Judy can offer a less conventional example of a career in Pediatrics. She can also offer insight around leadership and QI opportunities. She is happy to support and encourage trainees on their paths within training and beyond.
